ABOUT ME

I am an experienced Software Engineering student with a strong foundation in computer science and a passion for web development. Currently pursuing a Bachelor's degree in Computer Science, specializing in software engineering. Skilled in various programming languages, including Node.js and React, with a diverse portfolio of web development projects. Committed to delivering efficient and user-friendly solutions while keeping up with the latest industry trends. I thrive in collaborative environments and enjoys tackling complex challenges. Eager to leverage my technical expertise and problem-solving skills to contribute to innovative projects and drive impactful results.

WORK EXPERIENCE

Web Developer
Rift Drop - Freelancer [01/09/2022 – Current]

City: Tirane
Country: Albania

I was contracted to make a website based on the game League of Legends that features user interactivity through messages, games and communities. The main technologies used in this system were Node.js with Express.js and sockets to achieve real time connection and a ReactJS frontend with MUI library backing it up. The system achieves a real time connection between all user, even in multiplayer games where things get more complicated. The monetization was done using crypto hot wallets, with the option in the future to add the normal credit card monetization.

Junior Web Developer
Black Box [23/08/2023 – 13/10/2023]

City: Tirane
Country: Albania

I worked with multiple projects consisting of a technology stack of:
-Next.js (typescript and tailwind)
-Node.js
-Postgres db
-AWS deployment
My main task were given in JIRA with a coordinated approach to problem-solving and code maintenance. It was important to have an optimized code and to have a clear test coverage for each task completed. Most of the tasks were in a full stack approach and I had to work with both Node.js and Next.js, so I became familiar with each technology even more.
